WORK PROTECTION

Origin and development

Held GmbH can look back on a company history of more than 75 years.

In 1946, the Held family from Abertamy in Bohemia (Sudetenland) began with the manufacture of work gloves in Burgberg / Oberallgäu. The production of robust and safe gloves was the core business of the company at that time.

At the beginning of the 60s, motorcycle gloves were produced for the first time and subsequently protective motorbike clothing.

Today, the family business is run by the fourth generation and operates as a supplier of protective motorbike clothing and accessories in a global market.

Quality is a tradition at Held - with this self-image and paired with a pronounced willingness to innovate and striving for constant improvement to produce products of the highest quality level.

Long-standing partnerships with our customers and brand partners and a staff of more than 140 employees form another important pillar of the company's success.

Industrial safety equipment from HELD

With our specialist knowledge from glove and protective clothing development / production, occupational safety products was a logical consequence.

The demand from companies for customised products in this area rose sharply in the 90s, so that the product range was expanded.

Today we manufacture equipment for:

- » Companies in the field of Industrial safety
- » Rescue services
- » Fire brigades
- » Federal Armed Forces
- » Police

Materials in the field of industrial safety

Leather has been used for thousands of years to protect against injuries.

In addition to enormous robustness, abrasion and tear resistance, it is also characterised by its versatility and highest wearing comfort.

But also soft (textile) materials, some of which contain highly complex technologies are used. Properties that are indispensable for safe working.

HELD stands for quality, safety and innovation

Whether on a motorbike or working in dangerous areas: Our experienced Held development team gets to grips with customer's problems. Together we develop a product specially tailored to their needs.
